

## Defining and Non-Defining Relative Clauses 10

Read the following article. Then complete it using defining or non-defining relative clauses. Use the phrases from the note sheet below to help you. Add 'who', 'that', 'which' or 'whose' and commas where necessary

- only had wooden rafts to sail on	- was a Norwegian explorer
- is the world's biggest ocean	- was the name of an ancient god
- took place in 1947	- that Heyerdahl thought of
- show that there have been ancient civilisations there	- is owned by Chile
- theory was disputed so many times	- demonstrated how ancient people got to the island
- also believed this theory	- wanted to show everybody that his theory was right

### Easter Island

In the middle of the Pacific Ocean (1) \_\_\_\_\_ lie the islands of Polynesia. On some of the islands there are ancient roads and buildings (2) \_\_\_\_\_. The most mysterious of the Polynesian Islands is Easter Island (3) \_\_\_\_\_ where there are giant heads made of stone.

Thor Heyerdahl (4) \_\_\_\_\_ developed a theory (5) \_\_\_\_\_. He believed that people from Peru sailed more than 6000 kilometres across the Pacific Ocean on their small rafts. Nobody believed the theory (6) \_\_\_\_\_ because they believed that the people of Peru (7) \_\_\_\_\_ would not have been able to sail so far.

Heyerdahl (8) \_\_\_\_\_ started to build a raft like those of the ancient Peruvians. He built the raft with four friends (9) \_\_\_\_\_. When it was finished, they called it Kon-Tiki (10) \_\_\_\_\_. They spent a long time planning their journey (11) \_\_\_\_\_ and deciding what to take with them. The natural movement of the water carried them west. Although they had lots of problems during their journey with the weather and sharks, the boat was fine. It didn't sink. After 102 hard days at sea, the explorers arrived on one of the Polynesian Islands. Heyerdahl (12) \_\_\_\_\_ was proved to be right.
